Number of positions available: up to 12

Work Terms Available

Term	Application Deadline
Winter 2025	November 25 th 2024
Spring/Summer 2025	March 25 th 2025
Fall 2025	July 25 th 2025

Who We Are:

Warrior Engineering

Warrior Engineering is an Indigenous Owned and Operated business. We have the capacity to develop, advance and manage your engineering and construction projects. Our goal is to work in partnership with First Nation's communities to provide customized professional services, as well as be a leader in the ESG industry.

Warrior staff have over 50 years of combined professional experience developing, managing and implementing, environmental, geotechnical and civil engineering investigations and Provincial and Federal permitting and approvals for both private and government clients across northwestern Ontario.

About AtkinsRéalis

Created by the integration of long-standing organizations dating back to 1911, AtkinsRéalis is a world-leading professional services and project management company dedicated to engineering a better future for our planet and its people. We create sustainable solutions that connect people, data and technology to transform the world's infrastructure and energy systems. We deploy global capabilities locally to our clients and deliver unique end-to-end services across the whole life cycle of an asset including consulting, advisory & environmental services, intelligent networks & cybersecurity, design & engineering, procurement, project & construction management, operations & maintenance, decommissioning and capital. The breadth and depth of our capabilities are delivered to clients in key strategic sectors such as Engineering Services, Nuclear, Operations & Maintenance and Capital. News and information are available at www.atkinsrealis.com or follow us on [LinkedIn](#).

About AtkinsRéalis' Nuclear Business

AtkinsRéalis has over 70 years of global nuclear expertise, delivering nuclear technology products and full-service solutions to nuclear utilities around the world. AtkinsRéalis is the steward of CANDU® nuclear technology, operating on four continents, and provides advisory and engineering services to other nuclear developers. With an innovative technology portfolio, including access to over 500 patented solutions, AtkinsRéalis solves technically complex challenges across the whole nuclear lifecycle from design and new build through asset management and from life extension and late life management through decommissioning and waste management. AtkinsRéalis operates and manages government nuclear research sites, transforming ageing infrastructure and safely managing legacy nuclear waste. AtkinsRéalis' CANDU technology also allows for the co-production of medical radioisotopes for cancer detection and treatment. The company also supports cancer treatment through its partnership with TerraPower to extract isotopes from legacy nuclear material. Learn more on our [Nuclear market page](#).

Why Nuclear?

Canada will need to triple its power production level over the next 30 years. Nuclear has a large part to play in that. Clean, low-carbon nuclear power has the lasting potential to break the world's reliance on less sustainable alternatives and has the capacity to generate consistent sources of baseline power, which intermittent renewable sources can't.

The growing demand for baseline power production has a massive impact (and opportunity) on employment. Candu Energy relies on a specialized workforce that's drastically growing to serve critical projects across Canada and export to the world. We are committed to building the talent required to execute industry needs.

In our Nuclear Team, you would be part of the team that:

- Works with the latest technologies
- Creates more sustainable energy solutions
- Collaborates with over 3,000 skilled experts
- Delivers end-to-end project solutions and supports all stages of the asset lifecycle

Employment Conditions:

- Internships are coordinated by Warrior Engineering
- 37.5 hours per week with flexible start times.
- Hybrid work conditions – 3 days in office and 2 days from home
- Condition of hire- pass AtkinsRéalis security clearance.
- 1 hour per week of mentoring from Warrior Engineering

What's in it for you?

- The opportunity to work on a major project;
- A wide array of learning and development opportunities;
- Paid internship; and
- An exciting work environment focused on health and safety.

Does one of these opportunities speak to you? If so, reach out to:
