Warrior Engineering Ltd. – Senior Field Inspector / Road Construction Senior Inspector

Job Description:

You will provide support to the Warrior team by assisting with and conducting a wide range of Civil Engineering consulting tasks and occasional community engagement in Indigenous communities throughout Ontario.

Work and Responsibilities

- Perform on-site inspection and contract administration duties on MTO highway construction projects at a Senior Inspector level (rcsi) per the MTO Construction Administration Tasks and Specifications (CAIS/CAITM) requirements
- Maintain daily documentation of contractor work and contract progress in MTO online Contract Management System referring to the appropriate Contract Administration specifications, milestones, etc., promptly and accurately
- Read and apply contract drawings, tender documents, Ontario Provincial Standards (OPS), etc., applicable to the site operation and ensure the contractor adheres to all contract requirements
- Ensure approved construction materials are used and conduct material sampling for Quality Assurance testing
- Ensure appropriate traffic control measures by the contractor are in place in accordance with OTM Book 7 requirements and the Contract documents
- Prepare and maintain clear and concise field notes and site plans/sketches
- Communicate with colleagues, clients, contractors, and other regulatory agencies and/or stakeholders
- Work with Microsoft Word, Excel, AutoCAD and other computer software
- Prepare technical emails, letters, reports, meeting minutes, etc.
- Complete field safety meetings, conduct work safely and maintain company equipment

Requirements:

- Diploma or degree in Civil Engineering and possess OACETT Road Construction Senior Inspector (rcsi) designation or equivalent
- Possess a valid driver's license
- Experience inspecting highway construction projects or similar type of work
- Sound knowledge of design standards, specifications, and materials associated with construction as well as laws and regulations including Environmental, Occupational Health and Safety, etc., as applicable to construction contracts
- Ability to work flexible schedules and travel to site locations
- Willingness to learn
- Ability to work both independently and in a team environment

Closing Date: Open until filled
